SUBJECT **Best 2000 – 100 %
performance and availability
during Olympic Games Athens
2004**

Biokit's Elisa processor Best 2000 was the instrument selected by the Doping Control Laboratory of Athens, the centre in charge of the doping control for the athletes who participated in the Olympic Games Athens 2004.

After the Olympic Games, the centre released a document explaining its satisfaction with the Best 2000.

Please, find attached the official letter from the Olympic Athletic Centre of Athens << Spiros Louis>>.

Doping Control Laboratory of Athens

Accredited by the World AntiDoping Agency

Accredited by the Association of Official Racing Chemists

Accredited by ESYD No.1 : ELOT EN ISO/IEC 17025

ATHENS JUNE 10, 2005

TO WHOM IT MAY CONCERN:

We, the Doping Control Laboratory of Athens, are the center in charge of the doping control for the athletes who participated in the Olympic Games Athens 2004. One of the instruments we use for the doping control is a Biokit's BEST 2000 Elisa processor, installed by the distributor of Biokit in Greece, BioChem Diagnostics S.A.

After a professional installation and training, and with the whole technical support from both companies, we confirm that the instrument BEST 2000 performed its duty perfectly, and we could process all the samples without any delay nor problem.

Due to the critical importance of the success of the Doping Control in the Olympic Games, we needed 100% performance and availability of the instrument during the whole Olympic period, for a number of different users. Therefore we confirm that the instrument is fully reliable and user friendly, being easy to manage and maintain, and with an intuitive software.

The Laboratory Director

Costas Georgakopoulos, Ph.D
