**SUBJECT Bioelisa Package inserts
on CD-ROM**

Dear Customer:

With the aim of making ongoing improvements in its products, Biokit will begin implementing a CD-ROM to replace the current package insert booklet, in all bioelisa kits.

By avoiding the use of paper, Biokit wants to collaborate with amelioration of the environment. Every year the company prints 200,000 bioelisa paper package inserts weighing a total of 8 tons.

The CD-ROM runs automatically when introduced in any Windows-based computer. Bioelisa package inserts have been sorted first by the six standard languages and second by each product group. The text of the package inserts matches the most recent version of each bioelisa "Instructions for Use" (IFU) on paper. The only difference is that IFUs are now released in individual languages.

Material Safety Data Sheets (MSDS), procedural charts and bibliography have been also included.

End users may now consult or print only the section that interests them.

Introducing the use of CD-ROM package inserts into the whole bioelisa product range will be done progressively as soon as the current Biokit stock of paper package inserts for each individual bioelisa product is finished.

The first bioelisa products to be made available with CD-ROM inserts will be:

Code	Product	Batch
3000-1233	bioelisa HEV IgG	A-2609
3000-1210	bioelisa Toxo IgG	A-1409
3000-1246	bioelisa CMV Colour	B-1709
3000-1141	bioelisa Helicobacter IgG	B-4009
3000-1143	bioelisa HIV 1+2 (rec)	A-2009
3000-1102	bioelisa anti-HBc	B-2609
3000-1156	bioelisa HTLV 4.0	C-0709

"Instructions for Use" can also be requested from Biokit by fax: +34 93 860 90 16, phone: + 34 93 860 90 00 or directly from your Biokit distributor.

.../...

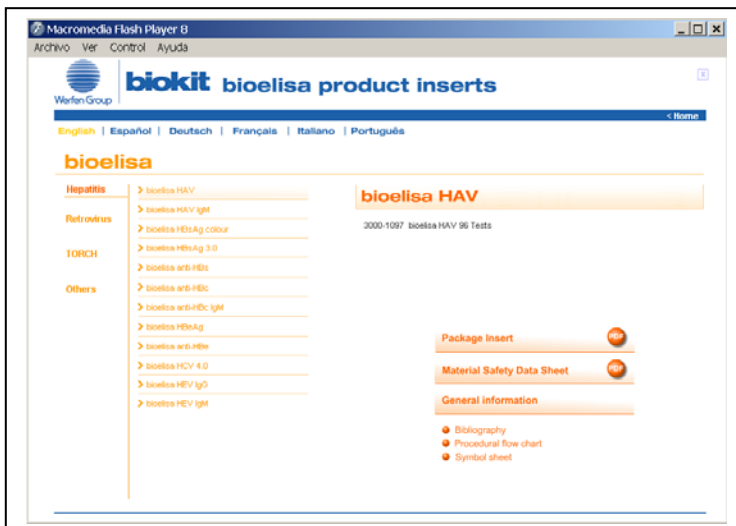

.../...

The CD-ROM runs automatically when inserted into any Windows-based PC. The following screen appears, allowing end users to select the language first of all:

Next, the product group has to be chosen: Hepatitis, TORCH, Retrovirus and Others with the corresponding list of related bioelisa individual assays.

Finally, the package insert, MSDS or any other related information on this product can be selected.

IMPORTANT NOTE:

Customers who have problems running the CD-ROM automatically can easily access information by clicking on the CD-ROM device from “My PC” on the Windows desktop. Simply open the “Idiomes” folder and run the Biokit.exe file.

Biokit recommends all distributors to have a copy of the CD-ROM, to be ready for end-user enquiries. CD-ROM copies may be requested from the Biokit customer services in your next purchase orders.

If in doubt, not hesitate to contact the Biokit sales department.
