Please contact our customer service dpt, either to Mrs Rosa Relats rrelats@biokit.com, Cecilia Margalef cmargalef@biokit.com or Lidia Pujol lpujol@biokit.com in order to know the stock situation before ordering.

As a replacement of T3000-2181 Quantex Toxo reagent + buffer and T3000-2180 Quantex Rubella reagent + buffer, we would like to offer you two possibilities:

1) Rapid test

Toxocell Latex (ref. 3000-4525) and the Rubagen (ref. 3000-4001) are excellent and very well known rapid latex particle agglutination test on slide for the qualitative and quantitative determination of rubella virus antibodies.

2) BioElisa

Also our elisa kits (bioelisa TOXO and Bioelisa Rubella) could be an excellent option.

Do not hesitate to contact us for any further information you might require.
